## WORK EXPERIENCE

---

### ScanWave

Senior Web Developer

Amman, Jordan

Mar 2020 - Oct 2023

- Joined the team as a web developer at ScanWave, the company provides Cybersecurity services to monitor and protect corporates, banking, and financial institution's critical systems.
- Contributed to the GRC Platform's (Governance, Risk Management, and Compliance) update, which kept clients protected by informing them of the most recent exploits and vulnerabilities.
- Designed and developed the public facing website for ScanWave using 6 popular technologies: ReactJS, Redux, Framer Motion, Material UI (MUI), Asp.net Core, and SendGrid.
- Added a newsletter to the public facing website, and added new services to the GRC platform.
- Maintained content for the GRC Platform and for the public facing website using CMS service and added cool features for the GRC platform, like custom print for reports and certificates.

## PROJECTS

---

### Public Facing Website - ScanWave

[scanwave.io](https://scanwave.io)

Sep 2022 - Aug 2023

- Designed and developed the public facing website for ScanWave using 6 popular technologies: ReactJS, Redux, Framer Motion, Material UI (MUI), Asp.net Core, and SendGrid.
- Learned about SendGrid to implement the newsletter feature.
- Added a newsletter to the public facing website.
