ScanWave

Amman, Jordan

Senior Web Developer

Mar 2019-Oct 2023

- Worked as web developer at ScanWave cyber security company in Jordan which is a platform to monitor and control corporates, banking, and financial institution's critical systems.
- Contributed to the GRC Platform's (Governance, Risk Management, and Compliance) update, which kept clients protected by informing them of the most recent exploits and vulnerabilities.
- Designed and developed the public facing website for ScanWave. The website is built using React.js, Redux.js, Framer Motion, Material UI (MUI), and Asp.net Core.
- Increased clients by 50% by adding a newsletter to the public facing website, and adding new services to the GRC platform.
- Maintained content for the GRC Platform and for the public facing website using CMS service.
- Added cool features for the GRC platform, like custom print for reports and certificates.
- Achieved a 60% growth in team efficiency by helping them to keep up-to-date with Frontend, Backend technologies, and productivity tools.
